

The remedy for the fraud that is the financial system has been uncovered.

This remedy has been buried by the powers that be because it is so powerful, so lawful and so ethical that it brings the perpetrators to its knees. It is rooted in the Bills of Exchange Act (specifically section 25) and is specific to South Africa.

Please join our community, led by Dr. Johan Joubert. We are bringing justice to banking, tax, traffic, TV licenses and other unfair commercial violations.

Lawyers are terrified of this (particularly the dodgy ones) and have no idea how to handle it.

We need the support of honorable people. I therefore invite you to join our community by clicking [here](#). It contains all kinds of information on the subject (all free) including Johan's journey of how he, out of sheer necessity, discovered it.

I won't force this on you, so please opt-in using the link above if you wish to be part of this change.

Scott

"DISOLVING THE MONEY ILLUSION"

A few weeks after you have been DELIVERED, you are REGISTERED ("to the crown") with a BIRTH certificate. This certificate gives you a name, forthwith to be designated on all official documents in CAPITAL LETTERS. Your name in capitals is actually a corporation that has been created on your behalf. It is called a juristic person or strawman.

Your name is not you, it is a separate legal entity. This Juristic Person ("strawman") allows you to participate in commerce. Commerce is a product of maritime law and "the law of the sea." So many of our English words sound like shipping terms for this reason: words like ownerSHIP, receiverSHIP, custodianSHIP and citizenSHIP and why you need a passPORT for travel. The law of the sea is the law of trade and every statute of every law in every country that exists today is maritime / civil law. They are all about money and that is the end of it.

Are you with me so far Simon? Your birthname is a corporation (actually a "trust") and this trust is used purely to trade. It evokes a body of law based on CONTRACT and a contract requires offer and acceptance. If you do not personally agree/consent/accept a statute, it does not apply to you. You are not taught this at school. You are not taught that you have two separate identities: i) your physical body and ii) your juristic person. Instead, you are taught to obey the law without question.

Unless you hurt someone or steal from them (which is common law - "the law of the land"), you are not bound by the laws that you think are there to protect you, but are actually there to drain you.

As you learn the legal language, you will quickly see how the system consistently requires your consent, even when it is to your detriment. For example, if someone from TV LICENCES phones and asks for Mr/Mrs "Simon Repanis", and I say "yes, that is me" you have just sealed a contract with them. Because legislation is nothing more than a set of corporate rules, you can only be invited to comply, you cannot be forced. Because we are "chattel" (cattle) and don't know any better – we humbly comply, thinking we are doing the honourable thing. By complying, we unknowingly hand over our unlimited lawful power to a limited corporation who has no idea the extent of their own exploitation.

Now, when you take out a loan, you are tricked into believing that you are borrowing money. If you understand the trickery, you will quickly realise that only a human being has the ability to bring credit into existence. What I am saying is this: you are not borrowing money, you are CREATING it. You don't realise that you are creating money and the bank doesn't disclose this information to you. Instead, that money sits in an escrow account for three years. Because it is not claimed within that period, like a ship lost at sea, it becomes subject to maritime salvage law and claimed by whoever gets to it first. Rest assured, that isn't you.

The bank tricks you into believing that it is their money that they are lending you. Then, to make matters worse, the bank asks you nicely if you wouldn't mind signing a separate document called a "promise to pay." You promise to pay your credit card at the end of each month, you promise to pay your car in 5 years and your house in 20. Either way, your promise to pay is a very valuable document which did not exist in the system until you created it. Furthermore, it includes INTEREST and this interest is completely fraudulent.

This sounds confusing, and downright outrageous, but you have been lied to beyond your wildest dreams.

When you sign a "promise to pay" (which actually has nothing to do with the loan you believe you have taken out), that document is then sold, re-sold and re-sold again. This constant re-selling of a promise to pay is called fractionalisation and the process by which it moves through the banking system is called "money." Yes, you guessed it, the trillions of Rands that move around the South African economy is made from the millions of promises to pay that the many human beings of our land have been suckered into creating through their own hard work. We are obliged to work in the system for the rest of our lives to earn it back which, ironically, is precisely why it is called MORTgage. But earn it back how? And from what or from whom? We earn it by competing with other humans under the illusion that money is scarce .

If someone manages to elicit a promise to pay out of you (eg. a cell phone contract? A laptop contract? A home loan?) then that company is in a prime position to "loan against" (ie. sell) that promise to pay to another party for a tidy sum. And so the illusion of money is perpetuated.

So, how do you get out of this mess? Well:

The first step is to realise the distinction between you the human being and your strawman / juristic person. Your name is not what you always thought it was. Until you sign your power away, you are a free human being in every sense of the law.

Then you have to learn what a contract really is. A contract is NOT a promise to pay over a period of time because a contract can only legally be created here and now. You must learn how to maintain your own lawful human self while all around you the system desperately tries to trick you.

Once you know what a contract really is, then you have to understand how to handle a negotiable instrument in terms of the Bills of Exchange Act. This is your main weapon – any bill or invoice you receive is NOT a bill, it is a very powerful contractual invitation for you to create money. Because it is in your hands (ie. has been sent to you), you can take 100% responsibility for it using your unlimited commercial liability. This is not a legal loophole, it is the foundation of our entire legal and monetary system!

Be advised that companies and banks do not yet understand this process. You need to know how to handle them when they get cross with you. You need to learn a perfectly lawful process that will a) cover you and b) make them liable for their own dishonour. Basically what happens is that you use the same legal trickery on them that they use on you. You put the ball firmly back in their court and they don't see it coming!

The end result: you stop paying debts and bills that you were never supposed to pay in the first place. You also help the economy by deflating our bankruptcy instead of adding to it. Again, this needs more time to explain and it is not simple. It requires guts, determination and knowledge to execute.

Now, you need to be aware of something very important: THIS IS NOT AN UNETHICAL OR DISHONORABLE COURSE OF ACTION. It took me some time to realise this. We are not trying to get something for nothing, or “get out” of paying or working. Furthermore, this course of action will not cause the system to collapse and leave millions homeless and destitute. The system is already collapsing and leaving people homeless and destitute all on its own. In fact, this course of action actually benefits society.

To finish off, I want to reiterate the honour principle. The Republic of South Africa is a corporation that was declared bankrupt in 1920. By creating more liability (ie. promises to pay), we are adding more liability to an already huge liability. You need to remove liability from the system, not add to it. We need to stop slaving away to an illusion in which a few people are making trillions through sheer manipulation. ENOUGH!

If you want to know more, Johan Joubert will explain all of this in great detail – [click here](#).

Sleep well.

Scott

PS. For those who are really understanding this... here is something a little more advanced. If your name in capital letters represents your juristic person / strawman, then what would be the antithesis of that? In other words, what kind of writing would represent you, the real human being? Well, it would have to be the perceived opposite of separate, standardised, block capital letters. It would have to be connected, lowercase, creative and completely unique to that individual... yes, I am talking about your signature. Now do you understand why your signature is required to be placed right above your name in block capital letters? This is the ultimate symbol that you, "the head",

hereby bonds with the lifeless, soulless, "body" (the strawman corporation) that has been created on your behalf to be taken complete advantage of.
